# EUROCORR 2025

7 - 11 September

## EUROPEAN CORROSION CONGRESS

### Announcement of a joint session on “Microbial corrosion and biofouling issues in marine environments”

In a natural marine environment, the corrosion process of metals and alloys always involves the influence of microorganisms and macro-organisms that quickly colonize immersed surfaces. A thick and complex biofouling dynamically evolves affecting the performance of technological materials. It forces antifouling countermeasures which constitute relevant environmental and economic costs for the marine sector. The joint session “Microbial corrosion and biofouling issues in marine environments” gathers papers that report studies addressed to document, understand, and prevent microbially influenced corrosion (MIC) processes in marine environments and related antifouling/anticorrosion strategies.

#### **Session organiser:**

Pierangela Cristiani

WP 10 – Microbial Corrosion

Philippe Refait

WP 9 – Marine Corrosion

**Expected duration:** 0.5 days

**Expected audience:** 40-60 persons

**Please submit your abstract online via [www.eurocorr.org](http://www.eurocorr.org) before 17<sup>th</sup> of January 2025. We are looking forward to your contribution and participation in EUROCORR 2025, on September 7-11, 2025, in Stavanger, Norway!**
