EUROCORR 2025

7 - 11 September

EUROPEAN CORROSION CONGRESS

Announcement of a joint session on “Cathodic protection in marine environments”

Cathodic protection is commonly used to protect metallic structures, e.g., offshore platforms, ships, seaport structures such as steel sheet piles, marine renewable energy devices and so on. The joint session “cathodic protection in marine environments” focuses on specific aspects of cathodic protection in seawater, including development of new standards, modelling of cathodic protection, influence of calcareous deposit, environmental impact, etc... The session commonly includes papers dealing with industrial marine applications and papers reporting fundamental studies about cathodic processes taking place on metal surfaces in seawater.

Session organiser:

Philippe Refait

WP 9 – Marine Corrosion

Jérôme Cruzillac

WP 16 – Cathodic Protection

Expected duration: 0.5 days

Expected audience: 40-60 persons

Please submit your abstract online via www.eurocorr.org before 17th of January 2025. We are looking forward to your contribution and participation in EUROCORR 2025, on September 7-11, 2025, in Stavanger, Norway!
